PASSAGE 1:

Minh often eats much candy. So he has a toothache. He is scared of seeing the dentist He is sitting in Dr. Lai's surgery now .Dr.Lai is very kind. She smiles at Minh and says, "Don't worry, Minh. You have two small cavities but it isn't serious. The other ones are fine.". Then she fills the cavities in Minh's teeth. He feels very happy. - 2. He has a toothache.
- 3. The cavities are serious. ...
- 4. Dr. Lai advises him how to take care of his teeth.

PASSAGE 2: How can we keep our teeth healthy?

Firstly, we ought to visit our dentist twice a year. He can fill the cavities in our teeth before they destroy the teeth. He can examine our teeth to check that they are growing in the right way. Unfortunately, many people wait until they have toothache before they see a dentist.

Secondly, we should brush our teeth with a toothbrush and fluoride toothpaste at least twice a day – once after breakfast and once before we go to bed. We can also use wooden toothpicks to clean between our teeth after a meal.

Thirdly, we should eat food that is good for our teeth and our body such as milk, cheese, fish, brown bread, potatoes, red rice, raw vegetables, and fresh fruit. Chocolate, sweets, biscuits and cakes are bad, especially when we eat them between meals. They are harmful because they stick to our teeth and cause decay.

- 1. We should visit the dentist every six months.
- 2. There is no need to brush teeth after meal
- 3. Many people only go to the dentist when they have toothache.
- 4. Cakes and candy are kinds of food that are good for teeth.

1.New research says eating an apple every day can protect your body from a heart attack. The research is from Oxford University in England. The researchers said if people in England over 50 years old ate a daily apple, 8,500 fewer people would die each year from heart attacks and strokes. They added that if all adults ate more fruit and vegetables every day, there would be 11,000 fewer deaths in England. Lead researcher Dr Adam Briggs explained how healthier eating can have big effects on our health. He said: "It just shows how effective small changes in diet can be, and that both drugs and healthier living can make a real difference inpreventing heart disease and stroke."

2. A newly-released study reveals that walking fast in your old age is a sign you will live a long life. The report in the Journal of the American Medical Association analyzed data from nine studies that involved 34,485 senior citizens. Participants in the research were regularly tested over a period of 21 years. The researchers looked at the relationship between walking speed in the over-65s and expected longevity. They concluded that the faster an older person can walk, the longer they can expect to live. Lead researcher Dr. Stephanie Studenski said: "It's a real part of the human experience to see that when someone slows down with age, they may not be doing as well as they once were."

Many people catch a cold in the springtime and/ or fall. It makes us wonder... if scientists can send a man to the moon, why can't they find a cure for the common cold. The answer is easy. There are literally hundreds of kinds cold viruses out there. You never know which one you will get, so there isn't a cure for each one.

When a virus attacks your body, your body works hard to get rid of it. Blood rushes to your nose and brings congestion with it. You feel terrible because you can't breathe well, but your body is actually "eating" the virus. Your temperature rises and you get a fever, but the heat of your body is killing the virus. You also have a runny nose to stop the virus from getting to your cells. You may feel miserable, but actually your wonderful body is doing everything it can to kill the cold. Different people have different remedies for colds. In the United States and some other countries, for example, people might eat chicken soup to feel better. Some people take hot baths and drink warm liquids. Other people take medicines to stop the fever, congestion, and runny nose.

In each part there is a bed for two members. The kitchen is large, and it is also the dining-room. In front of the house there is a large yard where Mr Hai dries his rice and corn at the end of the crops. He grows some flowers around the yard. VI. Read the passage then decide which statement is TRUE, which is FALSE (1m) Dear Peter.

Thank you for your letter. It's very interesting to know about schools in the USA.

I think schools in Vietnam are a little different. Vietnamese students usually wear school uniform. Classes start at 7.00 each morning and end at 11.15 in the afternoon. Students have a 30-minute break after three periods. At break, many students play games. Some go to the canteen and buy something to eat or drink. Others talk together, our school years lasts for nine months, from September to May. Then we have a three-month summer vacation.
